

I am asking that the FCC not implement any proposal that would lessen Indiana's Telephone Privacy law protections.

Indiana's Telephone Privacy law has improved your time at home by eliminating many, many calls that come all hours of the day but especially at supper time and in the evening hours.

Indiana's law has been very effective in eliminating as many as 5 calls or more a day that is about 30 to 40 calls a week.

--Any of your personal views about the importance of Indiana's law
